

Coordinating Complex Care for Older Adults Event

April 29, 2019
8:00am – 3:00pm

Junior Ballroom
Sheraton Vancouver Wall Centre
1088 Burrard Street

We are bringing together family and specialist physicians, Divisions of Family Practice, Health Authorities, and others for a full day of networking, sharing, and learning about innovative approaches to coordinating complex care for older adults.

Participants will have the opportunity to:

- Network with colleagues from around the province and gain valuable connections
- Understand the care complexities through available data
- Learn about the work underway across BC
- Explore streams of work that contribute to coordinating complex care and think about how these apply in your community

Definition and Initiative Goals

Care Coordination

- Care coordination is the organization of patient care activities between family physicians and specialist physicians to facilitate improved health care delivery to older adults.
- Care coordination also involves working with the patient, family, and informal caregivers.

Initiative Goals

The goals of the Coordinating Complex Care for Older Adults Initiative are to improve the:

- Coordination of complex care between family physicians and specialist physicians for older adults
- Quality and experience of care for providers and patients, families, and informal caregiver
