

Shared Care Covid-19 Support to Communities

■ What is Shared Care doing to support communities through Covid-19?

Since the start of the pandemic, Shared Care has provided funding to communities to adapt and plan to address challenges in coordinating care between physicians due to COVID-19. This funding will continue to be available throughout the pandemic.

Shared Care has also provided support and knowledge exchange between communities to share ideas for engaging physicians and how to move forward with projects during COVID-19.

■ What can funds be used for?

Funding requests related to COVID-19 should be aligned with Shared Care funding guidelines. Projects should include Family Physicians and Specialists and identify a gap that the community wants to address to create positive system change. Funds can be used for planning, meetings with physicians, and project management.

■ What can funds not be used for?

Funds cannot be used for PPE, cleaning costs, clinical fees, virtual care costs or facility rentals.

■ How can communities access support?

Contact your [Initiative Liaison in your region](#) to learn more about project funding and to discuss your initiative idea.
